SUMMARY

Self-motivated with sound basics, seeking an opportunity at an entry-level position in software development. Shall make use of the academic knowledge and the technical skills gained in innovative projects developments. Wish to have a growth in a dynamic and collaborative environment.

EDUCATION

Bachelor of Engineering in Computer Science

Pune Vidyarthi Griha College of Engineering and Technology • Pune, Maharashtra • 2025

EXPERIENCE

Web Developer Intern

Next24 Technologies

January 2024 - March 2024, Noida

- Through government internship portal AICTE, I have got an opportunity to be selected as a Web Development intern at Next24 Technologies, at Noida. This virtual intern was spanned for two months.
- Every week, I received tasks in Figma designs and implementation in front-end features to handle back-end operations like authentication and validation. I have completed these assignments well before the respective deadlines. Also, I have completed assignment in session management.
- Additionally, I worked on developing parody websites and continually expanded my technical knowledge while going through new concept.

PROJECTS

Full Stack Development Project

github.com/Aditya-0712/E-Commerce • August 2023 - November 2023

- Successfully developed a fully operative E-Commerce website, which comprises of all basic features such as cart, wish-list, delivery option, payment methods, orders, accounts, reviews, comments, etc.
- This full-stack dynamic website is built on the principles of Database Management Systems.
- Technology Stack: Node.js, Express.js, MongoDB, Mongoose, JavaScript, HTML & CSS, EJS.

Blogging Platform

github.com/Aditya-0712/BlogBase • September 2023 - January 2024

- Configured a versatile blogging platform that allows users to create or log into their accounts to publish their blog posts..
- These posts are accessible to everyone on the platform, enabling them to view, like, share, comment, and even dislike the content.

Chatting Platform

github.com/Aditya-0712/ChatApp • January 2023 - August 2023

- Developed a fully functional chat platform that allows users to engage in real-time conversations; by simply searching for a valid username, users can initiate chats seamlessly.
- This platform also provides user authentication, privacy, availability indicators, message notifications and enhancing the user overall experience.

Job Portal

github.com/Aditya-0712/JobPortal • July 2024 - August 2024

- This project is a comprehensive job portal application built with modern web technologies. It provides a platform for job seekers to find and apply for jobs, and for employers to post job listings and review applications.

CERTIFICATIONS

Python for Data Science and Machine Learning

Udemy • 2024

Modern React with Redux

Udemy • 2023

NodeJS – The Complete Guide Udemy – 2023 (MVC, REST APIs, GraphQL, Deno)

Udemy • 2023

Web Development Bootcamp

Udemy • 2022

SKILLS

Front End: HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind, Figma

Back End: Node.js, Express, MongoDB, Mongoose, Embedded JavaScript, MySQL

Programming: DSA, DBMS, OOP, C++, Java, Python

Data Science: Pandas, Matplotlib, Seaborn, NLTK, Sci-kit Learn.
