SUMMARY

A Computer Science Student eager to leverage my skills and enthusiasm, I am seeking opportunities to gain valuable industrial experience and contribute as a developer in a professional setting.

EDUCATION

Bachelor in Computer Science

Minor in Human Computer Interface (HCI) • PVG College of Engineering and Technology • Pune, Maharashtra • 2025

PROJECTS

Database Management Systems Project

PVG College of Engineering and Technology • <https://github.com/Aditya-0712/E-Commerce> • August 2024 - November 2024

- Developed a fully working E-Commerce website which comprises of all basic features such as cart, wishlist, payment methods, orders, accounts, reviews, comments, etc.
- A full-stack dynamic website built on the principles of Database Management Systems.
- Technology Stack :- Node.js, express.js, MongoDB, mongoose, Javascript, HTML & CSS, EJS.

Smart India Hackathon

PVG College of Engineering and Technology • October 2024 - December 2023

- Pitched our idea to industrial professionals.
- A platform for Project Management and Project Sharing with professional mentors helping project ambiguities.

Project Based Learning

PVG College of Engineering and Technology • https://github.com/Aditya-0712/PBL_db • April 2023 - June 2023

- This project comprises of an internet-based platform curated exclusively for students, ingeniously designed to foster engagement amongst college students. This platform not only facilitates the seamless acquisition of tickets for an array of technical/non-technical events hosted within their own academic institution but also extends the privilege of participation in a diverse spectrum of both technical and non-technical events happening in various tertiary institutions.
- Final submission for the subject Project Based Learning (PBL).
- Technology stack:- Node.js, express.js, MongoDB, Mongoose, Javascript, HTML & CSS.

COURSEWORK

Human Computer Interface

PVG College of Engineering and Technology • 2023 • User Experience(UX) and Visualisation

- Developing Interfaces

Modern React with Redux

Udemy • 2023 • Javascript (ES6+)

- Developing dynamic websites.

Java Spoken Tutorial

PVG College of Engineering and Technology • 2023 • Object Oriented Programming

- Programming with Java

Web Development Bootcamp

Udemy • 2023 • UI/UX

- Creating websites

SKILLS

Front End:- HTML, CSS, Javascript, React, Bootstrap, Tailwind, Figma

Back End:- Node.js, Express, MongoDB, Mongoose, Embedded Javascript, MySQL

Programming:- DSA, DBMS, OOP, C++, Java, Python
